

The Geese Story

Inside the Exercise

Using the "Geese" story as an analogy to work as a "team". When you see geese flying along in "V" formation, you might consider what science has discovered as to why they fly that way. As each bird flaps its wings, it creates an uplift for the bird immediately following. By flying in "V" formation, the whole flock adds at least 71 percent greater flying range than if each bird flew on its own.

People who share a common direction and sense of community can get where they are going more quickly and easily because they are traveling on the thrust of one another.
